

# Pine Manor Farms chicken is fed Non-GMO Project Verified feed\*

## ...but what does that mean?

We work hand in hand with the farmers who grow our corn and soy, the staple of our chicken feed.

The majority of these farmers live within 250 miles of our operation.

Every load of grain we receive is tested to ensure compliance with the Non-GMO Project Standard.

All of our chicken feed is carefully milled and prepared at our own feedmill.

Our feed ingredients, feed testing and entire feeding process are audited and verified by a third-party.

In addition, all farm and processing locations are audited onsite annually by the same third-party.

It takes a lot of work to earn this seal, and Pine Manor Farms is proud to achieve it!

*\*Raised and fed a diet in compliance with Non-GMO Project standards for the avoidance of genetically engineered ingredients.*

# Where Food Comes From, Inc. has verified all Pine Manor Farms' chicken to these independent, third-party standards:

At Pine Manor Farms, we watch over the entire process of hatching, raising and processing our chickens to ensure that our high standards and quality are maintained the entire time. Pine Manor Farms' chickens are verified by Where Food Comes From, Inc. to meet the Non-GMO Project Verification, Global Animal Partnership 5-Step Animal Welfare Rating, and Source Verification standards, and all products are air-chilled prior to packaging to ensure the best tasting, safest Pine Manor Farms chicken possible.
