

Job Title:

Regional Verifier - Northeast

Required Skills & Experience:

- Independent and free of conflict of interest
- Fair-minded and able to maintain an objective approach at all times
- Strong critical thinking skills
- Excellent organization and attention to detail
- Customer-service focused with proven communications and people skills
- Strong aptitude for professionalism and confidentiality
- Working knowledge of Microsoft Office and willingness to learn proprietary IT systems – hardware, software and mobile applications
- Extensive experience (5+ years) in livestock/agriculture industry
- Associate's or Bachelor's degree in Animal Science and/or related agriculture field preferred OR 15+ years professional experience in the same field(s)

Additional Requirements:

- Located in the Northeast and able to travel throughout the region
- Extensive knowledge of agricultural systems, with a primary focus in dairy, processing facilities and food manufacturing
- Auditing and/or verification or certification experience preferred
- Additional working knowledge and experience in any of the following categories is a plus and will be weighted heavily in preference: beef, poultry, swine, crops, and/or feed productions systems

Roles and Responsibilities:

- 100% travel as the schedule dictates
- Verifiers will be trained on program requirements and participate in ongoing training, knowledge share and process improvement.
- The core verification process includes: coordinating verifications with the office and customer, preparing for onsite verifications, conducting verifications, completing the verification checklist and submitting all relevant information to the Customer Verification Specialist team.

Salary: Independent contract position; income potential based on audit capacity.
